 in/alexandria-duell |  alexandriaduellswe.netlify.app |  duella1

SKILLS

FRONT-END	BACK-END	TESTING	GENERAL		SOFT
Javascript	NodeJs	Jest	Github	Confluence	Creative
HTML5	ExpressJs	Cypress	Git	Notion	Passionate
CSS3	Knex	React Testing	Swagger Docs	Agile Development	Hard-Working
React, Redux	PostgreSQL	Library	Netlify	Object Oriented	Critical Thinker
Context API	Python		Render	Programming (OOP)	Open Minded
NextJs	SQLite3		Whimsical	Relational Databases	Empathetic
TailwindCSS	MySQL		Figma	AWS sdk	Growth Mindset
	REST APIs		Google Collab		Self-Starter
	Prisma				Team Player

EDUCATION

Bachelor of Science, Computer Science

Oregon State University

Expected 2026

GPA: 4.0

Bachelor of Science, Mathematics and Elementary Education

Grand Valley State University

2012 – 2018

GPA: 3.57

WORK EXPERIENCE

Software Engineer

Contract – Ambit

Jan 2024 – Present

Remote

Description: Working on a cross-functional team of 6 people to develop a data management tool with an interconnected frontend website for doctors to refer to.

Technologies: React, NextJs, Tailwind CSS, Node, PostgreSQL, Prisma

- Employed responsive and user-friendly UI/UX designs, enhancing frontend performance for an optimal user experience.
- Employed version control systems such as Git for managing the codebase, branching, and merging, fostering seamless collaboration among team members.
- Actively engaged in migrating and upgrading an existing application to a modern technology stack, thereby enhancing performance, scalability, and maintainability, while ensuring minimal downtime and backward compatibility.

Software Engineer

Freelance – The Biscuit Garden Website

Dec 2023 – Present

Remote

Description: Designed and created a website for a dog daycare and boarding facility.

Technologies: React, HTML5/CSS3, Javascript, Netlify, Whimsical

- Collaborated closely with clients to design and execute a React App Website from inception.
- Implemented test-driven development methodologies to proactively identify and rectify bugs in the production environment.
- Maintained transparent communication channels with clients to ensure their needs were met efficiently.

ALEXANDRIA DUELL

WORK EXPERIENCE CONT.

Backend Engineer

Story Squad

Jan 2023 – Oct 2024

Remote

Description: Working on a cross-functional team of 10 to deliver a fully functioning application that help kids get interested in reading, writing and drawing

Technologies: Node JS, Express JS, PostgreSQL, AWS, Digital Ocean

- Developed and deployed a relational database alongside a dynamic API.
- Devised and executed unit tests to detect and address bugs in the production environment.
- Engaged in regular code reviews and participated in weekly engineering discussions to uphold code quality and foster team synergy.
- Facilitated seamless communication among team members through both chat and video conferencing.
- Crafted comprehensive technical documentation using platforms like Notion, Confluence, and Theneo.

Software Engineer

Freelance – Character Randomizer

Aug 2022 – Aug 2023

Remote

Description: Designed and creating an application to create random characters for game masters and players in the table top role playing community (mainly Dungeons and Dragons).

Technologies: React, HTML5/CSS3, Javascript, Node JS, Express JS, PostgreSQL, Netlify, Render, Whimsical

- Initiated and executed the development of a React App from scratch.
- Designed and implemented a robust relational database in conjunction with a dynamic API.
- Applied test-driven development principles rigorously to preemptively identify and resolve production environment bugs.
- Continuously honed requisite knowledge and skills to meet project demands effectively.

Backend Engineer

SchwaaWeb

May 2023 – Aug 2023

Remote

Description: Deliver a fully functioning application that allows customers to utilize chatGPT easily on a cross-functional team of 6

Technologies: Supabase, Postgres, Flutter, Dart

- Spearheaded the design and implementation of a dynamic API integrated with a relational database.
- Collaborated effectively across interdisciplinary teams to innovate new features and ensure seamless deployment.
- Focused on developing the skills and knowledge most pertinent to project success.
- Produced technical documentation efficiently utilizing markdown and Confluence for streamlined knowledge sharing and reference.

Assistant Manager

Receptionist and Kennel Tech

The Biscuit Garden

Aug 2022 – Feb 2023

June 2020 – Aug 2022

Apex, NC

- Implemented a new software system and migrated the old system's database into the new system
- Created and implemented an organizational system to find materials and charts more easily increasing productivity by 10%
- Supervised a team of 4-5 people to ensure quality animal husbandry and exquisite customer service
- Made and canceled reservations for services, checked customers in and out using two different software systems, and collected payments for services rendered
